Towards a sustainable future!

FAIR' N GREEN since 2022

WEINBIET
MANUFAKTUR

FAIR'N
®GREEN

The certification scheme for sustainable viticulture
Our contribution across the four pillars of sustainability:

Corporate Governance

- Corporate mission statement incorporating sustainability principles
- Investment decisions based on sustainability
- Night harvesting to take advantage of cooler grape temperatures

Environment

- On-site electricity generation covers approx. 2/3 of our energy needs
- Further expansion of our photovoltaic capacity in 2024
- Lightweight glass bottles to minimise our carbon footprint

Society

- Multi-generational, family-based wine production for over 120 years
- Voluntary and community engagement in local associations, public life and cultural initiatives
- Long-standing, trusted partnerships with our suppliers

Value Chain

- Mandatory cover cropping to promote biodiversity
- Nature-oriented winemaking with minimal use of oenological additives
- 100% herbicide-free viticulture and 100% biologically sourced nitrogen
- 100% vegan winemaking

HOLISTIC – INDEPENDENT – MODERN
